

The graph displays four metrics over time:

- Energy (blue line):** Starts at a high value and decreases rapidly, following a similar path to the Prior initially, but levels off at a higher value than the Prior.
- Prior (orange line):** Starts at a high value and decreases rapidly, following a similar path to the Energy initially, but levels off at a lower value than the Energy.
- Fidelity (green line):** Starts at a low value and increases slowly, crossing the Mass line around time 0.35.
- Mass (red line):** Starts at a low value and decreases very slowly throughout the time interval.

The x-axis is labeled 'time' and ranges from 0.0 to 0.45. The y-axis is unlabeled.
