

The graph displays four metrics over time and iterations:

- Energy (blue line):** Starts at a high value and decreases rapidly, reaching a plateau around iteration 150.
- Prior (orange line):** Starts at a high value and decreases rapidly, reaching a plateau around iteration 150.
- Fidelity (green line):** Starts at a low value and increases gradually, reaching a plateau around iteration 150.
- Mass (red line):** Remains constant at a low value throughout the iterations.

The x-axis is labeled 'iterations' (0 to 300) and 'time' (0.00 to 0.30). The y-axis is unlabeled.
