

The graph illustrates the convergence of four metrics over time. The x-axis represents time from 0.0 to 0.5, and the y-axis represents iterations from 0 to 50. The legend identifies the following series:

- Energy** (blue line): Starts at approximately 45 iterations and decreases to about 15 iterations by time 0.5.
- Prior** (orange line): Starts at approximately 45 iterations and decreases more rapidly than Energy, reaching about 10 iterations by time 0.5.
- Fidelity** (green line): Starts at approximately 5 iterations and increases to about 15 iterations by time 0.5.
- Mass** (red line): Starts at approximately 5 iterations and decreases to about 2 iterations by time 0.5.

The Energy and Prior curves are very close initially but diverge after time 0.1. The Fidelity curve crosses the Prior curve at approximately time 0.45.
