

The figure displays four metrics over time and iterations:

- Energy (blue line):** Decreases from approximately 0.15 at iteration 0 to about 0.05 at iteration 150.
- Prior (orange line):** Decreases from approximately 0.15 at iteration 0 to about 0.02 at iteration 150.
- Fidelity (green line):** Increases from 0 at iteration 0 to about 0.01 at iteration 150.
- Mass (red line):** Remains constant at 0 throughout the process.
