

The graph displays four metrics over time and iterations:

- Energy (blue line):** Starts at a high value and decreases rapidly, following a similar path to the Prior metric, eventually leveling off near zero.
- Prior (orange line):** Starts at a high value and decreases rapidly, following a similar path to the Energy metric, eventually leveling off near zero.
- Fidelity (green line):** Starts at zero and increases slowly, reaching a small positive value by the end of the time period.
- Mass (red line):** Remains constant at zero throughout the entire duration.
