

The graph displays the convergence of four metrics over time. The 'Energy' (blue) and 'Prior' (orange) metrics decrease sharply from their initial values at time 0.0, with 'Prior' reaching a lower value than 'Energy' by time 0.4. The 'Fidelity' (green) metric starts at a low value and increases steadily, crossing the 'Prior' metric around time 0.6. The 'Mass' (red) metric starts at a low value and decreases slowly over the entire time range.
