

The figure displays four metrics over time:

- Energy (blue line):** Starts at a high value and decreases rapidly, following a similar path to the Prior initially, but levels off at a higher value than the Prior after approximately 0.12 time units.
- Prior (orange line):** Starts at a high value and decreases rapidly, following a similar path to the Energy initially, but levels off at a lower value than the Energy after approximately 0.12 time units.
- Fidelity (green line):** Starts at a low value and increases slowly, approaching the level of the Energy and Prior curves as time progresses.
- Mass (red line):** Remains constant at a low level throughout the entire time range.
