

The figure displays four metrics over time and iterations:

- Energy (blue line):** Decreases from approximately 100 at iteration 0 to about 20 at iteration 120.
- Prior (orange line):** Decreases from approximately 100 at iteration 0 to about 10 at iteration 120.
- Fidelity (green line):** Increases slightly from approximately 0.01 at iteration 0 to about 0.02 at iteration 120.
- Mass (red line):** Remains nearly constant at approximately 0.01 throughout the iterations.
