

The figure displays four metrics over time and iterations:

- Energy (blue line):** Decreases rapidly from a high value and stabilizes at a low value after approximately 0.15 time units.
- Prior (orange line):** Decreases rapidly from a high value and stabilizes at a low value after approximately 0.15 time units.
- Fidelity (green line):** Increases slowly from a low value and stabilizes at a high value after approximately 0.15 time units.
- Mass (red line):** Remains nearly constant at a low value throughout the entire duration.
